**Re: John M. Nolan, Jr. v. Reading Blue Mountain
& Northern Railroad Co.
Civil Action No: 02-CV-2805**

Dear Mr. LaRosa:

Please allow me to correct several inaccuracies within your letter of July 14, 2003.

Although you continue to insist that you "agreed" to postpone the depositions last Friday, that was not the case. We requested that you work with us to reschedule those depositions; you declined and therefore we had a telephone conference with Judge Tucker who ordered that counsel work together to reschedule the depositions at a time and location so as to least disrupt the railroad's operations. Judge Tucker agreed that the depositions as noticed on July 11th in West Chester did not meet that criterion, therefore, she effectively quashed those subpoenas. Only then did you "agree" to my offer to reschedule the depositions for July 16th and July 18th.

Your accusation that I misled the court as to the basis of defendant's objection to holding the depositions on July 11th is false. During the conference call, I advised Judge Tucker and yourself that the railroad's operations would be unnecessarily disrupted if three of its engineer employees (Michael Bischak, Chad Frederickson, Christopher Bost) were required to appear for their depositions you unilaterally noticed for July 11th **at your chosen location in West Chester.** Two of the three engineers are stationed at defendant's Pittston location which is approximately 123 miles from West Chester according to MapQuest.com. A copy of this mileage calculation is enclosed for your review. This calculation is infinitely more accurate than your ruler, the method you told Judge Tucker you used to calculate the distance. I will gladly re-address this issue with the court if you insist on misrepresenting my position and accusing me of false statements to the court.

Your continued insistence on holding depositions of defendant's employees in West Chester remains entirely unsupported and violates Judge Tucker's ruling that counsel work together to cause the least disruption as possible to the railroad's operations and the ten

employees you wish to depose. Instead, you demand the depositions be held in an area more convenient to you, not the witnesses. You have failed to provide any reason why the depositions should be held approximately one hour from defendant's headquarters and well over an hour from many of the residences and work stations of the witnesses. The burden placed on attorneys to travel to Reading is not a factor. Reading is a compromise location between defendant's headquarters in Port Clinton and your chosen location in West Chester and best reflects the order of Judge Tucker.

If I do not hear from you by noon on July 15, 2003 that the depositions this week will be held in Reading, I will assume your position remains unchanged and I will be forced to contact the court once again to resolve what should be an issue counsel can agree upon, especially in light of Judge Tucker's clear directive.

Thank you for your attention.

Very truly yours,

WHITE AND WILLIAMS LLP
